The Company follows prudent remuneration practices and its approach to remuneration is intended to drive meritocracy within the framework of prudent risk management. Remuneration is linked to corporate performance, business performance and individual performance.

The Company has a judicious and prudent approach to compensation and does not use compensation as the sole lever to attract and retain employees. Employee compensation takes into account a mix of external market pay and internal equity. The total compensation is a prudent mix of fixed pay and variable pay. The proportion of variable pay to total compensation is higher at senior levels and lower at junior levels.

The increase in remuneration is a function of factors outlined above. The performance of the Company has bearing on the quantum of variable pay declared for employees across levels.

- (x) The key parameters for any variable component of remuneration availed by the directors;

The Company's compensation policy and practices are similar to that of ICICI Bank, its parent Company. The KPIs of the MD & CEO are fixed at the start of the year. These KPIs, in addition to financial parameters, include non-financial parameters. At the end of financial year, the performance of the Company as well as performance of the MD & CEO based on his KPI (including those pertaining to compliance and risk) is evaluated, along with the performance of the Company. The variable portion of the compensation is decided based on the performance of both the Company and the Bank, as well as the individual performance of the MD & CEO.

v) Actuarial gains/losses are immediately taken to Profit and Loss account and are not deferred.

i) Income Tax

Tax expense comprises of current and deferred tax. Current income tax is measured at the expected amount to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. Deferred income tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax liability is recognized for all taxable timing difference and Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

At each balance sheet date the Company re-assesses unrecognised deferred tax assets. It recognises unrecognised deferred tax assets to the extent that it has become reasonably certain that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax assets are reviewed at each balance sheet date. The Company writes-down the carrying amount of a deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

j) Transfer and Servicing of Financial Assets

The Company transfers loans to bankruptcy remote Special Purpose Vehicles through securitisation transactions. The transferred loans are derecognised from the books of the Company and gains / losses are recorded, only if the Company surrenders the rights to benefits specified in the loan contract. Credit provisions and servicing obligations are debited separately to the Profit and Loss account. Retained beneficial interest in the loan is measured by allocating the carrying values of the loans between the assets sold and retained interest, based on the relative fair value measured at the date of securitisation. The carrying value of the retained beneficial interest is estimated at each reporting period end based on the forecasted cash flows from the assets securitised after adjusting for projected delinquencies, prepayments, etc. The resultant gains/ losses, if any are recorded in to the Profit and Loss account.

k) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events of bonus issue; bonus element in a rights issue to existing shareholders; share split; and reverse share split (consolidation of shares). For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

l) Accounting for Swaps

The Company enters into derivative contracts such as interest rate swaps to hedge balance sheet assets and liabilities. The impact of such derivative instruments are correlated with the movements of the underlying assets and liabilities and accounted pursuant to the principles of hedge accounting whereby interest differential received/paid is adjusted from/to interest expenses. The related amount receivable from and payable to the swap counter parties is included in the Other Assets or Other Liabilities in the Balance Sheet.

m) Impairment

- The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognised wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.
- After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful life.

n) Provisions and Contingencies

A provision is recognised when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on management estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or nonoccurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognise a contingent liability but discloses its existence in the financial statements. Contingent assets are neither recognized nor disclosed.

o) Leases
